

Join us in celebrating

Environment North @ 50 years!

It's free!
Music,
Munchies,
& More!

The party is at Roots to Harvest (450 FORT WILLIAM RD.) on September 10, 4:00 PM.

RSVP by September 6 to Susan Grinstead phone 807-632-6736 email susanegrinstead@gmail.com

Please bring a chair...additional details at environmentnorth.ca ★ UPDATE on potential NUCLEAR WASTE disposal near Ignace ★

1970s

1980s

1990s

2000s

2010s

Lake Superior

The roots of Environment North began in 1972, as a small group of citizens known as "People to Clean Up Lake Superior" who were concerned about releases of asbestos and mercury.

Nuclear Waste

Environment North was a key participant in the successful campaign to stop test-drilling for a nuclear waste disposal site near Atikokan and call for public hearings.

Lands for Life

Environment North's participation in the Ontario government's Lands for Life process helped to increase the protected land in Northwestern Ontario to 14%.

Climate Change

Through meetings and media, Environment North enhanced awareness of climate change. We also ensured that Synfuel's 2006 proposal be subjected to an environmental assessment, which was never completed.

Momentum

Collaborations with other organizations helped to build momentum and save the Experimental Lakes Area and helped prevent the Energy East pipeline. **The Nuclear Waste issue is back.** Environment North and others are voicing concerns!
